

## Notice of Inadvertent Duplicate Publication

IJKD 2009;3:60  
www.ijkd.org

The editors wish to draw attention to an article published in the *Iranian Journal of Kidney Diseases (IJKD)* that have also appeared in the *Saudi Journal of Kidney Diseases and Transplantation (SJKDT)*. The article entitled "Pulmonary Hypertension and Predisposing Factors in Patients Receiving Hemodialysis" was submitted by Mahdavi-Mazdeh and colleagues and published in the *IJKD*, volume 2, number 1, pages 29 to 33. Submission had been done after receiving no feedback in response to submission by the authors to the *SJKDT* for about 10 months. The corresponding author sent a copy of her correspondences with the *SJKDT* regarding their simultaneous publication. Accordingly, the editors confirmed that although the *SJKDT* had sent the acceptance letter before, the authors had not received their email, probably due to technical problems, and lost their connection with the *SJKDT*. Unfortunately, the situation was discovered while both journals were publishing the paper.

Consequently, the following articles share the same hypothesis, data, results, and conclusions, as a result of *inadvertent* duplicate submission:

Mousavi SA, Mahdavi-Mazdeh M, et al. Pulmonary Hypertension and Predisposing Factors in Patients Receiving Hemodialysis. *Iran J Kidney Dis*. 2008;2:29-33.

Mahdavi-Mazdeh M, Mousavi SA, Yahyazadeh H, Azadi M, Yoosefnejad H, Ataiipoor Y. Pulmonary Hypertension in Hemodialysis Patients. *Saudi J Kidney Dis Transplant*. 2008;19:189-93.
